## Education

**St Antony's College, University of Oxford**  
MPhil in Politics (Comparative Government)

2024-2026

Research: Effects of AI-generated content on political attitudes and voting behaviour.  
Supervisor: Prof. Rachel Bernhard, Nuffield College, Oxford.

**University of Bristol**  
BSc Economics and Politics, 1st-Class Honours

2018-2021

## Professional Experience

**Securely Technology Limited (Compliance)**  
Strategy Associate Manager

Apr. 2024-present

- Employee #10 at a seed-stage AI startup building GRC software for the B2B enterprise market.
- Built a new Post-Sales department with the Chief Strategy Officer and Chief Executive Officer.
- Architected compliance solutions directly with CISOs and CCOs of Fortune 500 companies.
- Reduced client onboarding time by 75% through automated backend processes using PostHog analytics.
- Led the development of a new growth marketing process, increasing inbound leads by 200%.

**Quanterium Technologies (Compose)**  
Senior Founder's Associate

2021-2024

- Employee #1 working directly with the founders to build an all-in-one inbox. Backed by tier-1 VCs.
- Led product marketing and go-to-market strategy scaling the beta user base from 0 → 1,200 users.
- Owned all aspects of the website, built from scratch using Webflow, Javascript and CSS.
- Implemented product analytics, working with product and engineering to iterate and deploy feedback.
- Led many projects with legal, accounting and investor teams, including operations for an acquisition.
- Helped improve DevOps with engineering and product teams, reducing deployment times.

**Strategy Consulting & Projects**  
BCG Project, Carnall Farrar, Strategy&

2019-present

- Data projects across oil & gas market entry, NHS hospital efficiency and pharmaceutical pricing.
- Applied advanced analytics to client problems, communicating results to senior stakeholders.
- Selected onto Jumpstart's startup-graduate matching programme (top ~1% of 5000+ applicants).
- Build personal side projects, including a web app recording College sport results; used JavaScript and the Firebase SDK for real-time data handling and Python Flask for backend for development.

## Skills & Tooling

- Quantitative and computational research methods inc. machine learning techniques.
- Python, R, Stata, SQL, Git, CSS, JavaScript (basic).
- Segment, Webflow, Figma, GitHub, Metabase, PostHog, Firebase.
